- Project Summary: (Please provide a brief statement about the purpose that the laptops will serve in your project site.)

Education is the most powerful weapon to change society! No fortress can resist him. But the fact finding is that the education system in Togo generally suffers several ailments, including, overcrowded classes, lack of poorly planned resources and programs. Just browse Togo to find that most of the schools are in an unacceptable condition and lack equipment. For many children in villages, a simple pen is a treasure. Everyone knows that in this century, a scanned modern education system is needed. Yet almost all schools in Togo in general and in particular those of the plateau region does not have computer skills , forcing some students to resort to cyber to practice the theoretical courses they receive the school. So they need the support of organizations that can provide resources for the improvement of educational programs and more efficiency. We are aware that currently, organizations dedicated to supporting community technology literacy programs in sub-Saharan Africa are few. This is why we find it very important to create a partnership with any organization working in this direction in order to enable transmitting knowledge to children who must evolve with society irrigated by the digital and give everyone the keys to success in his personal life, social life and professional life in the future. To this, we therefore commit ourselves to:

- Contributing to the increase in literacy rate in the most underserved communities in Togo in accordance with global standards.
- Facilitate access to computers and the world literature appropriate for students, educators and communities.
- Facilitate the gifts, transportation, distribution and management of all learning resources and materials.
- Create a relational framework between schools of Togo and those of other countries on the one hand and the Togo students and those of other countries on the other.
- Strengthen collaboration between African teachers and their global counterparts.

To achieve this, we will make our various activities across the organization: Youth Action for Sustainable Development (JADD -TOGO), a non -profit and apolitical association Action for Sustainable Development under the motivation of experienced youth from different activities branches that think a grassroots development as a solution of the ills of our people and one of whose objectives is to work for the basic education of Togolese citizen.

Dear Laptop receiver:

We are very pleased to have the opportunity to contribute to your project by providing technology to help bridge the digital divide.

With every right comes responsibilities. Technology, when adequately used, can provide very powerful means to aid those that are most in need. But if used improperly, it can also damage our environment. By receiving the above items, you are automatically accepting to abide by the following Labdoo global responsibilities:

(1) The items received will be used only for the purpose described by your organization at the time you solicited this donation.

If you intend to use it for a different purpose, you will contact first the Labdoo team at contact@labdoo.org.

(2) In the case that an incidence occurs to any of the received items, you will contact the Labdoo team at contact@labdoo.org,

Including in your email the tagging number of the item(s) related to the incidence and a brief explanation. The following

Incidences must always be reported:

(2.1) At the end of life of any of the received items, so that the item can be properly recycled.

(2.2) When an item breaks, malfunctions or any change in its status.

(3) Every six months, please send an email to contact@labdoo.org with the list of laptops that you have and their status (working or not working).

We thank you for your commitment to make our world a better place and we wish you best of luck in your humanitarian mission.

The Labdoo Team.
